

## Mobility Pro

Imagine writing up a repair order, printing out the repair order, and filling out your multi-point inspection form within minutes - all at the customer's vehicle. Picture using high-def animated graphics as a sales tool for selling services to your customers while they sit comfortably in your waiting room. With Mobility Pro you can.

Combing the mobility of a tablet and the power of the desktop on the hand held iPad, Mobility Pro by DPS is transforming the service drive experience for both dealership personnel and customers.

### Mobility Pro Features:

-  Data entry and screen sharing identical to your current DMS/desktop.
-  No data storage, yet all your customers' information is at your fingertips.
-  Easy access to all relevant desktop applications.
-  Always secure. Data is stored on your server; not on the iPad.
-  No shared DMS information with third parties. Works on all DMS platforms.

This is an Exclusive Partnership between DPS and FastLane Applications.
